

# **The Religion of *Homo Nexus*: Neuroplasticity in an Age of Enhancement**

**Tuesday,  
March 24**

**@ 3:15pm**

**in Beatty 115**

**Wells Fargo  
Auditorium**

**Andrew  
Aghapour**

**BA in RELS and PHIL  
from CofC in 2007;  
M.Phil, Cambridge  
University;  
Ph.D candidate,  
UNC-Chapel Hill**

Do you want a younger, happier brain? Would you like to unleash the explosive power of your mind and maximize your spiritual well-being using just a few simple tricks? How would you like to endlessly monitor your own health and behavior, and never stop training for the fleeting jobs of a global economy? These are the mixed offers of a new pop-theology espoused by Deepak Chopra, Andrew Newberg, and other scientific gurus of the soul. This talk will examine how religion is being conceptualized in our era of "mind hacks," "brain age," and neuroplasticity.
